## Critical factors

### District heating in South Tyrol - Italy

Culemborg, 12th and 13th of January 2018

Thomas Egger & Christoph Larch

Programme co-funded by the  
EUROPEAN UNION

# Critical factors

**Analysis and research on low number of district heating plants**

**Ask an extern independent expert to create the business plan**

**Which energy resources are available? Straw? Wood? Pellets? Biogas? Natural gas? Oil?**

**Other conditions? E.g. heating degree days, population density, tourism facilities**

**How is the competition? What alternatives are there for potential heat clients? How were they heating?**

**What are the juridical conditions? E.g. emission limit, aids, building laws etc..**
